Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-14 are drawn to a method for facilitating analysis of a commercial credit customer comprising determining first/second customer information wherein at least some of the first/second customer information is based on *a first/second plurality of commercial credit accounts* associated with the first/second customer, classified in class 705, subclass 38.

Invention II: Claims 15-17 are drawn to an apparatus comprising a processor in communication with a storage device and storing instructions adapted to be executed by the processor to determine first/second customer information wherein at least some of the first/second customer information is based on *a first/second business segment of a first/second plurality of asset-backed commercial credit accounts* associated with the first/second customer, classified in class 705, subclass 38.

Invention III: Claim 18 is drawn to an executable instructions adapted to perform the method comprising determining first/second customer information wherein at least some of the first/second customer information is based on a plurality of commercial credit accounts associated with the first/second customer and a first/second company type of the first/second commercial credit customer, classified in class 705, subclass 38.

Inventions I, II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as an apparatus comprising a processor in communication with a storage device and storing instructions adapted to be executed by the processor to determine first/second customer information wherein at least some of the first/second customer information is based on *a first/second plurality of commercial credit accounts* associated with the first/second customer. Also, the apparatus as claimed can be used to practice another materially different process such as a method for determining first/second customer information wherein at least some of the first/second customer information is based on *a first/second business segment of a first/second plurality of asset-backed commercial credit accounts* associated with the first/second customer.

Since these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art, there would be a serious burden on the examiner if restriction is not required, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

A telephone call attempt was made on November 27, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olabode Akintola whose telephone number is 571-272-3629. The examiner can normally be reached on M-F 8:30AM -5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on 571-272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
